

Dear Sir/Madam,

I am applying for a summer internship position at your organization.

My name is Abhelaksh Thakur, and I am currently pursuing a MS at the University of Southern California. My degree objective is Masters in Computer Science (General), and my tentative graduation date is Dec 2008.

I have 1 year of full time job experience at Wipro Technologies, Bangalore India. I have also successfully undergone internships at Thales Avionics Ltd. (U.K.), Defense R&D Organization (India), ACTL (India) etc. I have excellent programming and problem solving skills, along with a thoroughly technical background in Computer Science. I also have sound knowledge of computer networks and database systems having excelled in these courses at graduate and undergraduate level. My MS objective is to hone my skills in software engineering, computer networks, databases, web technologies and also learn more about active research areas like Semantic Web and Web2.0, whereby I can utilize these skills in different domains towards overcoming the future challenges involved.

I believe that I would be an ideal fit for a dynamic & eminent company like yours, where I can upgrade my skills while contributing to the growth of the firm.

Looking forward to a favorable response form your side.

Abhelaksh Thakur
MS Student, USC
